

The top 4 reasons Al projects struggle to move forward

...And how to help them stay on course with ease

Al projects often start with great promise but can experience setbacks along the way. With the right strategy, planning and expert guidance, these challenges can be overcome. Here's what might be slowing down your Al initiatives — and what you can do to keep everything moving toward a successful outcome.

Reason #1: Unclear use cases

Al projects need a clear focus to stay on track. Without well-defined use cases and clear ROI, projects may struggle and lose traction.

The solution: Prioritize high-value use cases that align with your

- specific business goals and offer measurable impact. Thoroughly scope use cases to ensure they are
- achievable and can be delivered on time, within budget, and with clear, tangible outcomes. Continuously evaluate and refine use cases to
- ensure they evolve with changing business needs and technological advancements.

Leverage Dell's deep expertise, comprehensive services, and robust partner network to help

Helpful solutions:

identify and prioritize the most impactful use cases for your business.

Lack of data strategy and security A solid data strategy keeps Al projects running smoothly. Without it, data overload or security

Reason #2:

risks can cause unnecessary disruptions. The solution:

Conduct an audit to uncover all relevant data for

- model development, training, and inference, then build a data strategy that ensures uninterrupted data flow. Strengthen data security to prevent breaches and
- ensure a safe, steady journey. Process AI at the data source to reduce latency and

Helpful solutions:

enhance security by minimizing data movement.

Dell's end-to-end data management and

security solutions can help streamline Al workflows, ensuring secure, optimized, and accessible data for faster deployment.

Infrastructure deployment complexity and efficiency The right infrastructure is essential for AI projects to progress efficiently. Poor infrastructure decisions can cause unnecessary delays.

The solution: Right-size infrastructure to meet the specific demands

of your AI workloads, ensuring scalable performance.

Reason #3:

use automation to enable efficient deployments and ongoing infrastructure management.

Optimize infrastructure for cost-effectiveness,

- scalability, and long-term performance benefits.
