

# Unlock AI's Full Potential

Simplify. Transform. Protect.

The Dell and Red Hat solution, based on open standards and open-source software, is designed to help your enterprise soar. Dell and Red Hat simplify how enterprises adopt and operationalize AI at scale so they can truly transform their business operations. The result?

**Accelerate time-to-value | Reduce complexity | Simplify governance**

## #1 Simplify AI workflows

Empower teams with easy-to-use tools, automation, and robust support

Red Hat's open-source software small script stack combined with Dell's infrastructure rooted in open standards help simplify deployment and operations while enhancing flexibility and interoperability.

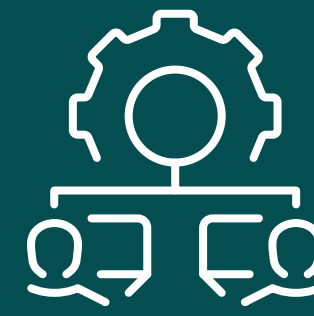

### Accelerate time-to-value

With a fully validated solution, and simplicity built into every layer, teams move from ideas to outcomes faster.

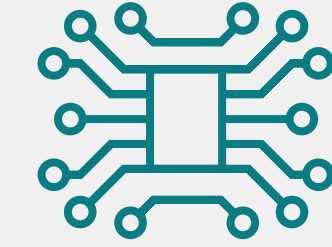

### Enhanced interoperability

The solution, rooted in open standards and open-source software, enhances interoperability and simplifies complex workflows.

### Support for an open ecosystem

With support for a broad, open ecosystem, your teams can leverage tools and frameworks that align best with objectives.

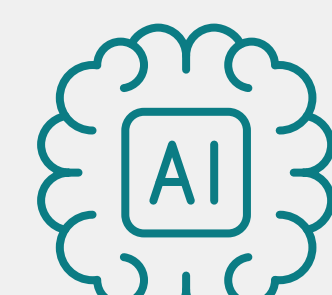

### Operationalize AI with ease

The solution is purpose built for today's AI workloads, making it easier than ever to move from POC to full-scale production deployments.

### Scale on your terms

With enterprise-grade capabilities, our solution reduces infrastructure hurdles and inconsistent results, empowering you to scale your AI initiatives predictably as your needs evolve.

### Unlock innovation

Red Hat and Dell offer the flexibility to deploy a wide range of use cases on a common platform, so you can effortlessly transform your business functions.

## #2 Transform business operations

A common platform for a range of use cases delivers faster innovation and greater impact

Red Hat and Dell support organizations as they move from proof-of-concept stages to production deployment. Our joint solutions provide the flexibility to operationalize diverse AI use cases, from optimizing supply chains to personalizing customer experiences, driving faster innovation, and deeper business impact.

## #3 Embrace AI with confidence

Protect AI workloads at scale with built-in security to ensure trust and compliance

Dell and Red Hat AI solutions are designed to deliver leading-edge innovation, robust security, high availability, and greater predictability as enterprises scale AI across their organizations.

### Secure infrastructure

Trusted, secure Dell infrastructure provides an ideal foundation for sensitive AI workloads and datasets.

### End-to-end protection

Red Hat OpenShift's sophisticated controls and governance mechanisms empower enterprises to protect their AI workloads regardless of location.

### Trusted partnership

With over 25 years of partnership, Dell and Red Hat joint solutions deliver customer-centric innovation, operational simplicity, and peace of mind.

## See AI in action

No matter the industry, co-engineered solutions from Red Hat and Dell can accelerate AI adoption, simplify deployment, and provide secure, compliant infrastructure – unlocking new value, improving operational efficiency, and reducing costs.

### Healthcare

Improve patient care with faster diagnostics and scalable data handling.

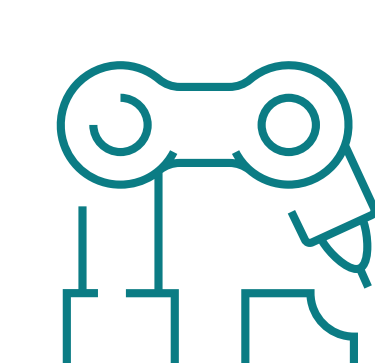

### Finance

Enhance security and efficiency with quick fraud detection and scalable transaction processing.

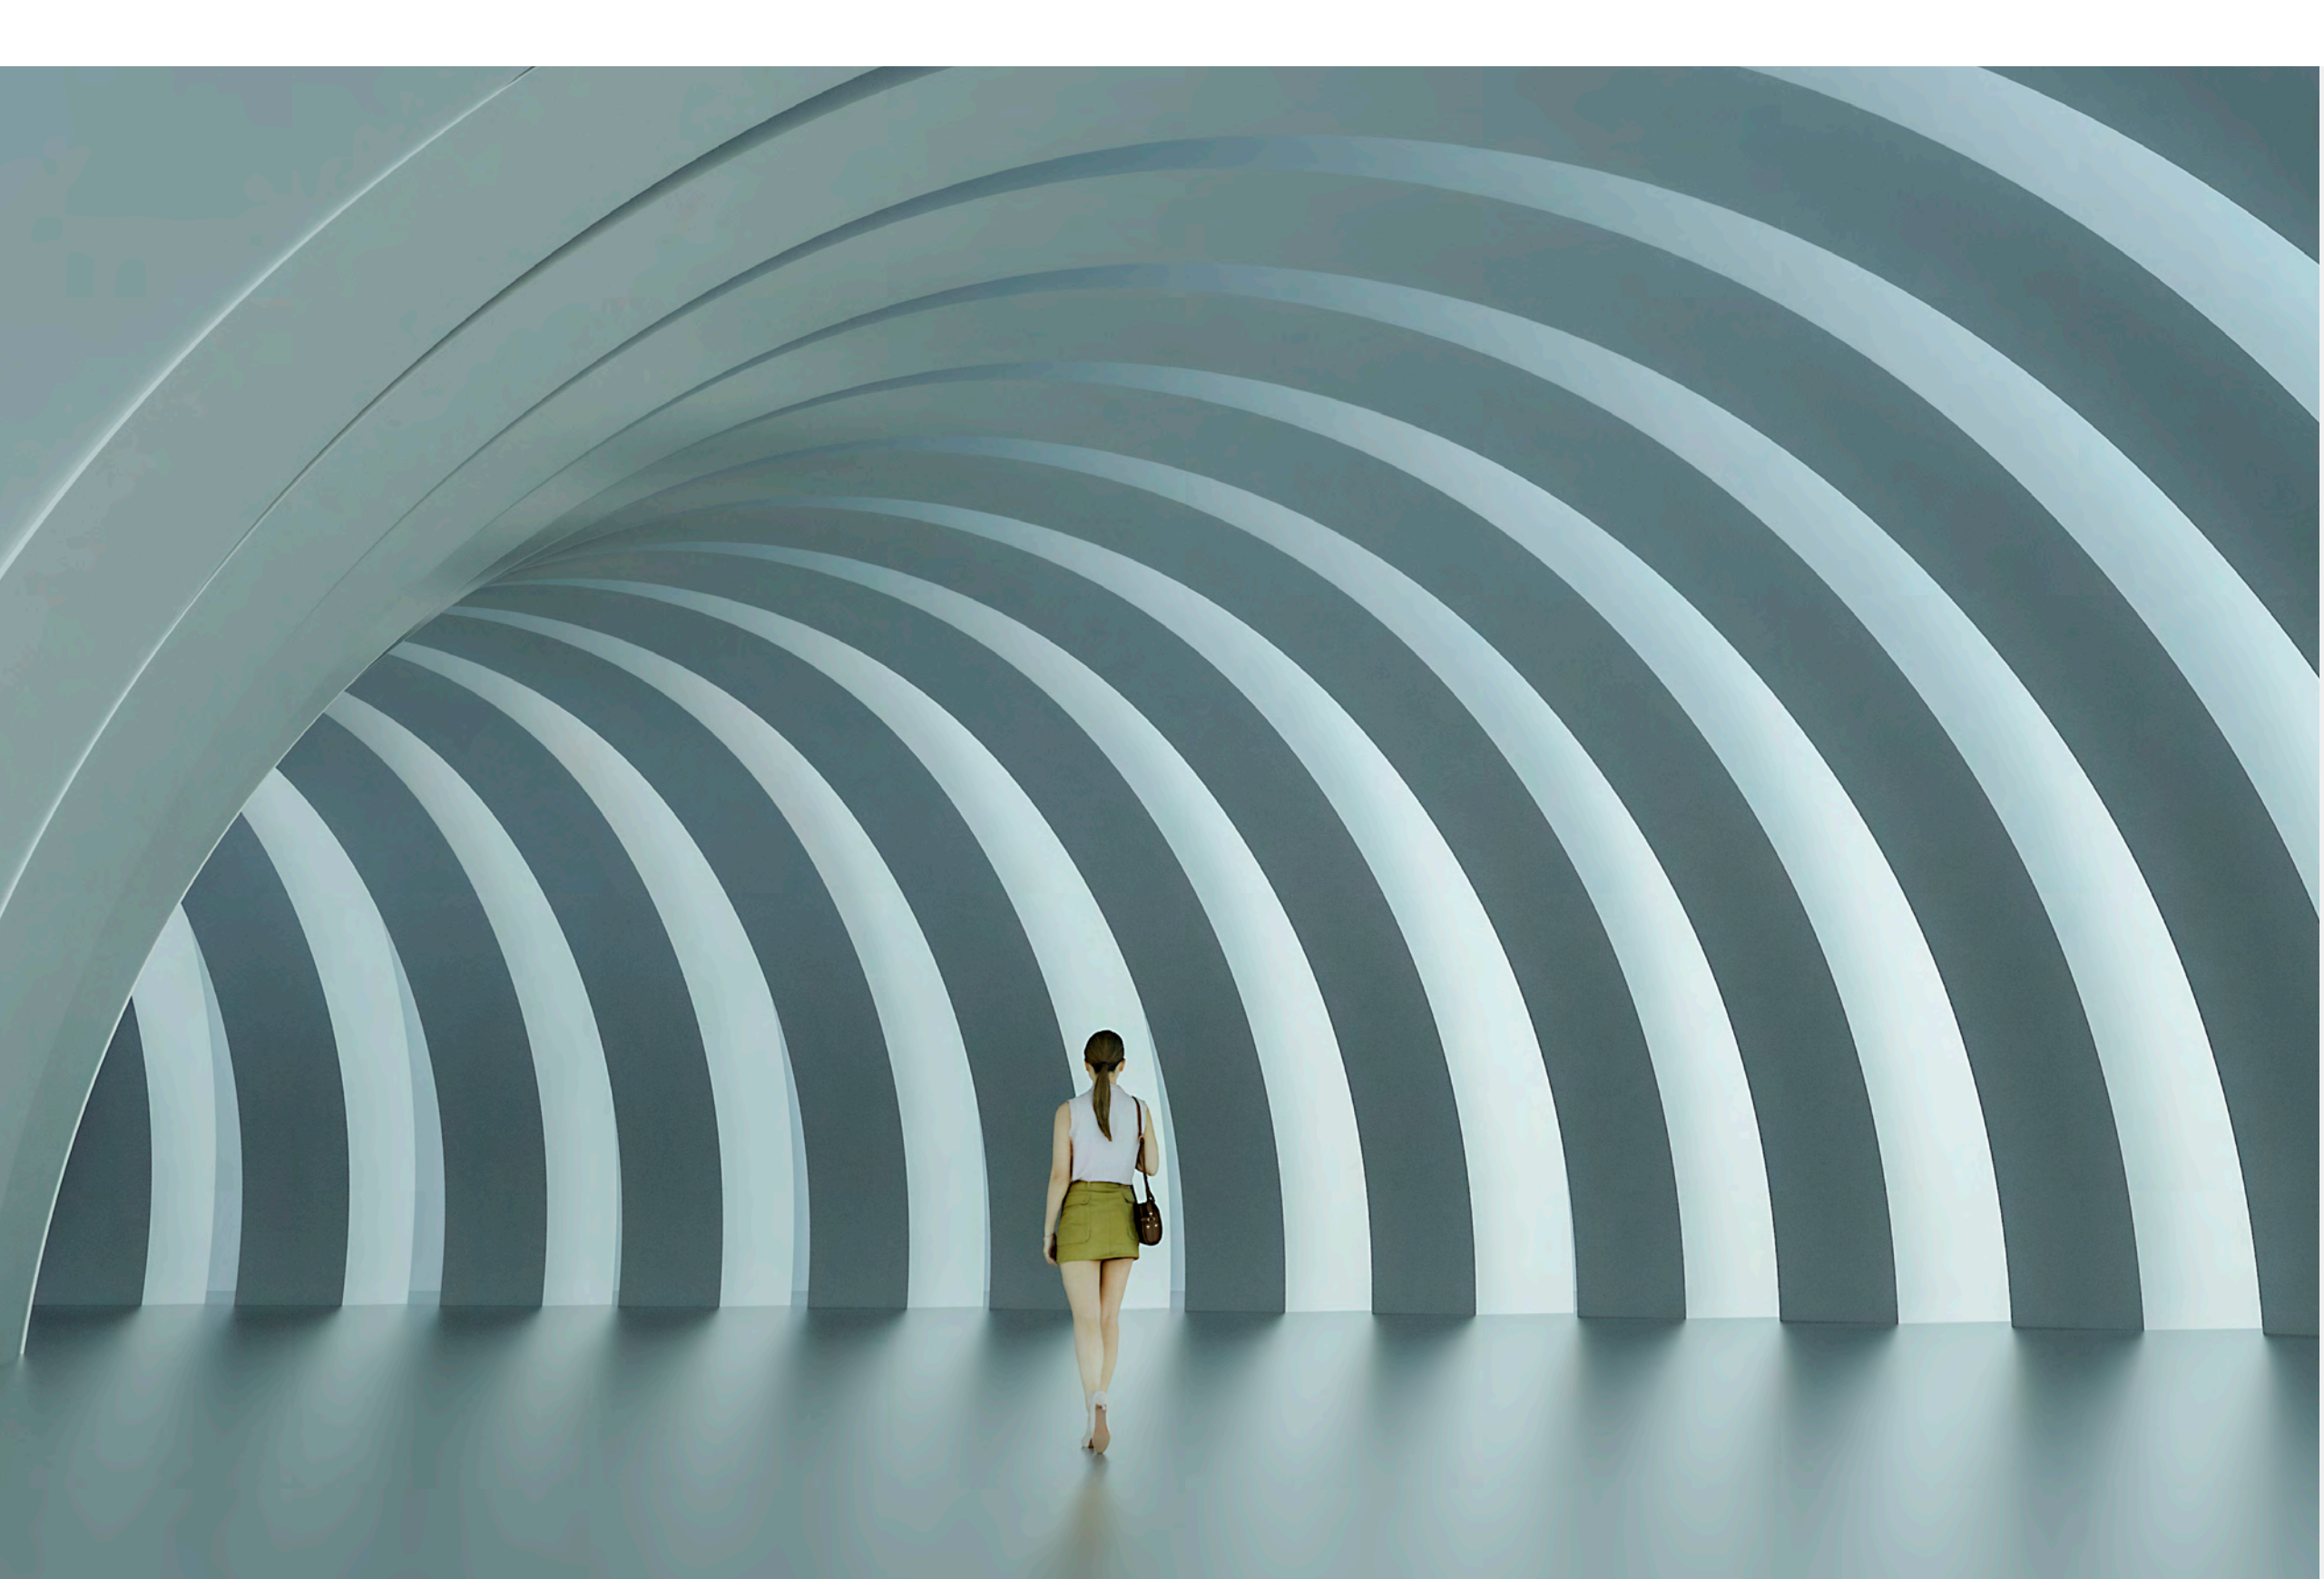

### Retail

Improve customer experience with real-time insights and personalized experiences.

### Manufacturing

Boost productivity and minimize disruptions with predictive maintenance and automated operations.
